

Clark Forklift

At this time, there are no less than 350,000 Clark lift trucks performing worldwide, and in excess of 250,000 in service in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, duel fuel, gas, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 specific parts intended for 20 unique designs of lift trucks and automated equipment. Your regional Clark Dealer is your complete source for availability of all your components requirements offered by Clark Totalift.

Clark's extraordinary Parts Distribution Facilities are conveniently stationed in Louisville, Kentucky, which serves both their clients and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and customers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Motivated to offer the highest level of value and service to our users, Clark remains on the cutting edge when it comes to enhancing efficiency and benefiting performance.

Clark Totalift has a very outstanding worldwide support network. With over 550 locations worldwide, dealer representation in over 80 countries and 230 locations in North America, their high level of commitment to their consumers predominates the material handling market.

Clark proudly remains an innovative leader of the industrial equipment industry, pioneering protection features such as the operator restraint system. This exceptional commitment to safety is now a standard feature on every lift truck.

Clark's recurrent effort to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 — Clark, is the first forklift manufacturer across the world to be certified with the internationally approved quality standard ISO 9001 for all of their manufacturing facilities. Also, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any environmental limitations, thus placing them in a dominant industry position.

Resource Efficient Manufacturing

Clark has chosen the system of "Lean Manufacturing" at all of its assembly plants for the reason that this method is extremely economical and allows for minimal use of resources. Developed to ensure maximum proficiency, this system is intended to discover and acknowledge the most effective methods for production facility stewardship. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Engineering

By working in concert, Clark's product suppliers and engineers communicate towards improving product proficiency while minimizing expenses. The contemporary value engineering agenda combines modern product improvement and delivers improved customer support and service within the industry.
