

## Fall Protection Certification in Vernon

There are high numbers of injuries at work related to falling and large amount of fall-related deaths reported each year. Most of these instances might have been prevented with better training, better precautions in place, and by correctly equipping workers before the chance for injury takes place. The third leading cause of death in the workplace is due to lack of proper fall protection. This falls behind automobile accidents and violence in the workplace.

The number one cause of death within the construction trade come from fall-related accidents. There is more possibility for fall accidents depending upon the types of work being performed in your workplace. Thus, being familiar with the unique hazards which exist within your work atmosphere and in your work situation could help you deal with hazardous situations and be ready for them prior to they occur as well as help you avoid fall injuries and deaths.

It is a good idea for your business to encourage regular workplace training and to encourage fellow staff to follow the precautions and to take them more seriously. Implementing an environment which encourages training and safety at all times can help you as well as your co-workers prevent unavoidable accidents.

An implemented regular safety program at work would help to avoid possible injuries, in order to avoid potential safety related lawsuits, and so as to prevent potential PR problems for your company. Fostering cooperation and respect amongst your workers and foremen, issues could be prevented with worker unions. The best reward will be that you will prevent your employees paying with their lives and or serious health situations that might have been prevented if the right measures had been utilized.
